Selecting and Playing Games

The GAME MENU Screen
From the game menu screen, you can browse through the available game systems.

• Use the player 1 joystick, spinner or trackball to navigate through the different game systems.
• Once the desired game system is shown, use the SELECT button to select the game system.
• All of the available games installed for the selected game system will be displayed.

The GAME LIST Screen
From the game list screen, you can browse through the available games for the selected game system.

• Use the player 1 joystick, spinner or trackball to scroll up or down through the game list. You can also use the player 1 joystick left and right to jump up or down through the game list one page at a time. Player1 buttons three and six are also used to jump up or down through the game list by letter.
• Highlight the desired game and press the SELECT button to start the game.
• To navigate to another gaming system, press the GAME MENU button. The system will return to the GAME MENU screen shown above.

Playing a Game
While playing a game, use the corresponding controls on the controller to navigate through the select game.

• To exit a game, press the EXIT/QUIT button. The system will return to the GAME LIST screen shown above.
• To pause a game during game play, press the PAUSE button. Press the button again to resume game play.
Control Panel Key Mapping
How to change MAME settings

To change controller setting for the MAME game system, first select and start ANY game.

Press the TAB key on the keyboard to enter the configuration menu.

Using the arrow keys on the keyboard, select Input (general) if you want to change the settings for all games. Select Input (this Game) to change only the settings for the current game.
Using the arrow keys on the keyboard, select the controls that you wish to configured and press the ENTER key. For example, to change the player 1 controls, select “Player 1 Controls”.

Using the arrow keys on the keyboard to select the control that you wish to configure.
Once the selected control is highlighted, press the ENTER key on the keyboard. Two opposing arrows will be displayed waiting for a key to be pressed.

Press the button on the controller (or move the joystick in the direction) you want to assign to the selected function.
